Three High-Efficiency Toilets that Make WaterSense

By Sandra Malm

Be the first to comment Share

Three companies unveiled their take on the high-efficiency toilet at the 2013 Kitchen & Bath Industry Show in New Orleans. All carry the EPA's WaterSense label but take advantage of unique technologies to do so. A WaterSense-certified toilet saves a family of four \$20 per month compared to a traditional 1.6-gallon toilet, and according to Sam Rose, director of showrooms at Ferguson Enterprises, consumers hesitant to try low-flow showerheads or faucets are more willing to try high-efficiency toilets.

Mansfield's Cascade uses a unique bowl design and swirling flush action to stay cleaner longer, according to the company. Using only 1.28 gallons per flush, the swirling action is created by visible holes at the top of the bowl, which help combat dirt and stains. Mansfield Plumbing. From \$139.
