

### Vanity collections

Living Square and Palace ceramic vanity collections offer customizable and cutable contemporary ceramic vanities and shelving solutions. Vanities can be cut to fit, even on a diagonal. Each collection has a full complement of furniture and accessories. Vanity sizes for Living Square run from 25.6" to 70", and Palace's countertops run from 35.4" to a double vanity at 70". Shelving is cutable to fit with the vanities, and Palace has integrated towel rails. **LAUFEN**.

### Condensing tankless water heater

The ecoTOUGH™ series of gas-fired residential condensing tankless water heaters now includes the NRC83, an

ENERGY STAR®-rated unit designed for smaller homes and multi-family dwellings. Available in indoor (2-pipe, direct vent NRC83-DV) and outdoor (NRC83-OD) models, the wall-mounted units

have an energy factor of 0.92 for natural gas and 0.94 with LP, about 30 points higher than a standard gas-fired water heater. NRC83 has a gas-consumption range of 16,000 to 157,000 Btu/h, flow rates from 0.5 to 8.3 gpm and temperature settings from 100°F to 140°F. **Noritz America Corp.**

### Kitchen faucets

The KWC SIN kitchen faucet series offers four ADA-compliant models. Each can be swiveled through 360°. A swivel spout model offers maximum clearance; other models have a pull-down aerator integrated into the

hose guide inside the spout; a pull-down spray that can extend more than 19" from the 360-degree swiveling spout; and a patented high flex® spring hose with an adjustable dual-jet spray and a swivel spout with a pivot range of a full 360°. **KWC**.

### Radiant tubing mat

A custom-designed, prefabricated, pre-pressurized network of PEX-a tubing, the Radiant Rollout™ mat is the ideal solution for faster, more consistent installations for large commercial radiant heating and cooling applications — saving up to 85% in installation time. The mat consists of hePEX™ (oxygen barrier) or AquaPEX® (non-barrier) PEX-a tubing connected with ProPEX® engineered plastic (EP) fittings, which are safe for burial in the slab and offer fast onsite customization when necessary. The mat can install about eight times faster than conventional radiant tubing installation methods, potentially shaving weeks off an installation schedule. **Uponor Inc.**

### Multi-function showerheads

The Waterfall™ series of 2.5 gpm showerheads are made of ABS and brass. The Multnomah™, a wide-faced "rain-style" showerhead, offers five unique spray patterns and comes in both a fixed and a handheld version. The Victoria™ offers seven different spray patterns and also comes in fixed and handheld versions. A combo-pack includes a fixed and a handheld showerhead from each series and a 3-way diverter. With the diverter, the two showerheads can work independently or together in one bath, or they can be separated and used in different baths. **ConservCo.**

### Condensing boilers & water heaters

Keystone boilers are available in five models from 399 to 850 MBH. High efficiency, condensing stainless steel heat exchanger and sealed combustion. Condensing volume water heaters in four models from 199 MBH to 500 MBH for high volume DHW needs have durable stainless steel heat exchanger; efficiency is 95% to 97%. Advanced control with a large user interface modulates firing rate for a 5 - 1 turndown. Combine up to 8 boilers or water heaters in a cascade arrangement and can interface with many building automation systems. **Triangle Tube.**

### Bathroom fixtures

The stylish, affordable Brentwood Suite's detailed beveled edges, scalloped corners and clean flat surfaces are seen in all the suite's fixtures. All tubs are roomy and deep; in addition to a soaking-tub option, homeowners can also enjoy spa amenities with whirlpool and air-bath configurations. Lavatories include self-rimming and under-counter models, and the matching elongated SmartHeight™ ADA toilet features a concealed trapway for easy cleaning, which is the consumer's No. 1 requested upgrade feature.

### Sophisticated bath fixtures

The SUPERIOR toilet, with coordinating washbasins, brings high style to the bath. Measuring 28" deep, front-to-rear, the toilet utilizes a standard 12" rough-in (drain socket). A single press of a chrome button atop the tank engages Jet Stream Flush, a system that uses 1.6 gpf to discharge water from the rim to clean the bowl, while a powerful stream from the siphon jet carries waste away. Coordinating washbasins are available in pedestal, wall-mount or undercounter styles, with three-hole or single-hole options. **INAX.**

### Collett covers

Part of a standard line of quick-connect fittings, the key to the fittings' unique locking ability is their patented collet, which comes with stainless steel teeth to grip inserted pipe and which provides, along

with an EPDM O-ring, a permanent, leak-proof seal. Color-coded collet covers are available in both inch and metric sizes for use in water treatment/filtration systems. The covers are available in black, yellow, blue, red, gray and green. Sizes range from 3/16" to 5/16" and 4mm to 22mm. A collet locking tool is available in sizes ranging from 3/16" to 1/2". **John Guest USA.**

### Condensing product accessories

A condensate neutralizer accessory runs condensation through a container filled with limestone media, which raises its pH level to make the liquid less acidic, re-

sulting in neutral water that can be drained directly from the unit into a public sewer. A dual pipe venting option for condensing tankless water heaters connects to a standard concentric vent via a concentric twin pipe adaptor, enabling more installation options by accommodating venting in tight spaces, such as between a ceiling and subfloor, making raised terminations easier and cheaper. **Rinnai America Corporation.**
