Mansfield Plumbing debuts its one-of-a-kind Cascade rimless, high-efficiency toilet

*-- The Cascade's unique bowl design and swirling flush action raise the bar
for high-efficiency toilets --*

PERRYSVILLE, Ohio (January 16, 2012) – Mansfield Plumbing Products (Mansfield) announces the U.S. launch of its rimless Cascade toilet, which is truly the first of its kind. The unique bowl design stays cleaner longer by eliminating the primary place dirt and stains collect – under the rim.

The swirling action that cleans the sides of the bowl is created by introducing water at the top of the toilet bowl when the trip lever is activated. The holes at the top of the bowl are plainly visible and accessible for easy cleaning. Plus the Cascade only uses 1.28 gallons per flush.

“Just like most Mansfield products, the Cascade is more affordable than most other high efficiency toilets in the market,” says Charles Scott, vice president of marketing for Mansfield Plumbing. “We pride ourselves in offering products that provide the consumer with a good value, saving them money through affordable prices and decreased water bills.”

ABOUT MANSFIELD PLUMBING

Mansfield precision manufactures more than 2.5 million pieces each year at its U.S. headquarters in Perrysville, Ohio. Two other plants operate in the U.S.: Big Prairie, Ohio, and Henderson, Texas. With almost 500 employees, Mansfield is one of the largest domestic producers of sanitary ware, and is proud to say many of the products are “Made in the USA.” Mansfield’s plumbing fixtures and fittings are available through one of the industry’s most extensive networks of more than 2,800 distributors located

throughout the U.S., Puerto Rico and Canada. Additionally, the company's plumbing products are sold through select retail, do-it-yourself home improvement centers and designer kitchen and bath showrooms. Mansfield Plumbing Products, founded in 1929, was purchased by Corona (one of the world's largest manufacturers of china) in 2004 and is a leading producer of top quality, high-design, performance plumbing fixtures and fittings for use in residential, commercial and institutional markets.
