

FOR IMMEDIATE RELEASE

MANSFIELD PLUMBING UNVEILS NEW SUITE IN ITS AFFORDABLE, HIGH-DESIGN COLLECTION

The new Enso Suite's organic design creates harmony in any bathroom

PERRYSVILLE, Ohio (Sept. 25, 2009) - Mansfield Plumbing Products (Mansfield), a leading provider of affordable, high-design and top-quality bathroom fixtures, announces the release of its new Enso Suite. After creating a variety of suites in modern, traditional and transitional styles, Mansfield's new Enso Suite is the company's first to be an organic design.

"With the addition of the Enso, our collection of suites offers even more variety to meet homeowners' personal styles," said Charles Scott, vice president of marketing for Mansfield Plumbing. "Our ongoing research gives an understanding of our customers' needs so we can continue to create products that meet their evolving demands. Priced at 30 to 50 percent less than competitive models, the Enso is the perfect combination of attractive style and affordable prices."

One luxury component of the Enso Suite is the elongated dual-flush toilet that uses only 1.1 and 1.6 gallons per flush – saving up to 30 percent of a household's water. The toilet is available in an ADA-compliant model and its unique HET (high-efficiency toilet) 3" valve virtually eliminates clogs. Other features include a contemporary two-piece design and a 2 1/8 inch glazed trap way, which guarantees strong and reliable flushing - 800 grams in MaP (Maximum Performance) tests.

The Enso Suite offers both drop-in and pedestal lavatories with spacious and splash-free bowls. The drop-in lavatory, designed to fit most standard size tops, can be used with a wide range of faucets including wall-mounted, single hole and 4 or 8 inch. The pedestal is available in 34¼ inch height to fit all statures and ages.

Enso's drop-in oval tub is available in four different sizes and three different options: Soaker, air massage or whirlpool. Air massage tubs feature a MoodScape™ chromatherapy system, with seven healing light settings and full spectrum sequencing mode. Options include HealthTouch™, a rigorous hydrotherapy massage with 50 powerful side/back air jets; GentleTouch™, a total relaxation with 60 air jets to immerse the bather from all sides; and

DualTherapy™, a combination of HealthTouch and GentleTouch features. Whirlpool tubs are available in basic, luxury and sensory packages. Whirlpools contain the Hydro-V™ back jet system with six jets to massage back and shoulder blades and the Dryjet™ which adjusts in direction and flow to create a circular pattern of water and warm air for a deep venturi therapeutic massage.

Mansfield Plumbing's suites allow customers to create seamless experiences in their bathrooms with designs that reflect their personal styles. The Enso Suite adds even more variety to a collection that meets top-quality standards at an affordable price. ABOUT MANSFIELD PLUMBING

Mansfield precision manufactures more than 4 million pieces each year at its U.S. headquarters in Perrysville, Ohio. Two other plants operate in the U.S.: Big Prairie, Ohio, and Henderson, Texas. With more than 450 employees, Mansfield is one of the largest domestic producers of sanitary ware, and is proud to say many of the products are "Made in the USA." Mansfield's plumbing fixtures and fittings are available through one of the industry's most extensive networks of more than 1,000 wholesale plumbing distributors with over 2,800 locations throughout the U.S., Puerto Rico and Canada. Additionally, the company's plumbing products are sold through select retail, do-it-yourself home improvement centers and designer kitchen and bath showrooms. Mansfield Plumbing Products, founded in 1929, was purchased by Corona (one of the world's largest manufacturers of china) in 2004 and is a leading producer of top quality, high-design, performance plumbing fixtures and fittings for use in residential, commercial and institutional markets.
