6. CAMBRIA

Two new designs in this line of Greenguard-certified surfacing capture the natural veining and beauty of marble and granite while offering the superior strength of quartz. Laneshaw (shown) embraces brown, tan, and black tones with hints of white and gold, while Armitage appears dark and deep with blends of black and gray and random flecks of copper and orange. The product is nonporous and comes with a limited lifetime warranty. 866.226.2742. www.cambriausa.com. Circle 338.

7. VELUX

New to the company's Sun Tunnel line of tubular skylights is a 14-inch-diameter curb-mount unit for low-slope residential roofs. The skylight features a specialized flashing component for installation on roofs with 0 to 30 degrees of slope. It can be used on shingle and metal roofs. 800.888.3589. www.veluxusa.com. Circle 339.

8. EVERITT & SCHILLING CO.

The company reclaims and salvages old barn wood and cabinet scraps to make its Re-Grained line of decorative wood tiles. Tiles are available in such species as alder, cherry, hickory, and walnut, and measure 2 inches by 6 inches, 2 inches by 2 inches, and 4 inches by 4 inches. 888.573.5554. www.eandstile.com. Circle 340.

9. TOURNESOL SITEWORKS

The Tournesol VGM Modular Living Wall system allows screening foliage to be planted horizontally. Recycled plastic planting modules hang on powder-coated rails, which fasten to any structurally sound wall. Grow-in takes one to three months before the modules can be hung. 800.542.2282. www.tournesolsiteworks.com. Circle 341.

10. MANSFIELD

The 1.28-gpf rimless Cascade toilet features jets positioned to create a swirling action that cleans the toilet as it empties the bowl. The unique design keeps the unit cleaner longer by eliminating the primary place that dirt and stains collect: under the rim. The Cascade is available in round front and elongated/ADA configurations. 877.850.3060. www.mansfieldplumbing.com. Circle 342.
