Product Focus: Dual-Flush Toilets and Accessories

Neorest integrated toilets

The TOTO USA Neorest 700H and 550H use dual-flush, high-efficiency flushing and eWater+ technology. The Cyclone flushing system creates a whirlpool effect that removes waste and cleans the bowl's surface and rim. After each flush, eWater+ mists the SanaGloss-glazed bowl with electrolyzed water, which has a slightly acidic pH value, preventing waste's adherence 80% better than dry porcelain. The toilets use 1-gpf for the full flush and 0.8 gpf for the light. These toilets can be installed in high-rise, multifamily buildings and the upper floors of single-family residences. **TOTO USA. www.totousa.com**

Dual-flush flushometer

Sloan's Dual-Flush Side Mount is a battery-powered flushometer that allows commercial facilities to easily upgrade to water-saving operations. The unit features Smart Sense technology with a self-adaptive infrared sensor that will initiate 1.1 gpf when the user is in range for less than a minute. If the user prefers to manually flush, he/she can select the appropriate flush cycle by pushing one of two buttons: the larger, black button is for the standard 1.6-gpf cycle and the small, green button is for the 1.1-gpf cycle (which offers a 31% water savings). **Sloan. www.sloanvalve.com**

ADA-compliant toilet

The Summit 3 dual-flush toilet from Mansfield Plumbing allows users to select from 1.1 or 1.6 gpf while flushing at 800 grams. The toilet comes in three configurations: ADA-compliant, elongated and round front, and has a three-bolt installation that eliminates tank-to-bowl leaks. The Summit has a 1 7/8" glazed trapway and is available in white, biscuit and bone colors. **Mansfield Plumbing. www.mansfieldplumbing.com**

Wall-hung, dual-flush toilet

All of Duravit's wall-hung toilets (available in Starck, Caro, Happy D., Happy D/2, Vero and Foster among others) are WaterSense-approved and include commercial dual-flush toilets. These options include 1.28- and 1.1-gpf rates, have a concealed installation system and support up to 880 lb. The wall-hung units are ADA-compliant and are available in compact (19 1/8"), standard (21 5/8") and elongated (24 3/8") depths. **Duravit. www.duravit.us**

WaterSense-approved dual-flush toilet

Caroma's Brisbane high-efficiency toilet features a two-piece, two-button dual-flush component (1.6/0.8 gpf). The WaterSense-labeled toilet has a large, fully concealed trapway and a 10" to 12" adjustable rough-in. The toilet measures 28 3/8" by 15 3/4" by 33 1/4" (the bowl height is 15 1/2"). **Caroma. www.caromausa.com**
