Mansfield Debuts the First Rimless High-Efficiency Toilet

Mansfield Plumbing Products announces the U.S. launch of its rimless Cascade toilet, which is truly the first of its kind. The unique bowl design stays cleaner longer by eliminating the primary place dirt and stains collect: under the rim.

The jet positioning creates a swirling action that cleans the toilet as it empties the bowl. The jet holes are plainly visible and accessible for easy cleaning. Plus the Cascade uses only 1.28 gallons per flush.

Mansfield first introduced the product a year ago to customers in Mexico through its Colombian division. With that success under its belt, Mansfield now turns its attention to the U.S. market. The Cascade is available in two configurations: Round Front and Elongated/ADA.

fluid™ Unveils Collection of Sustainable Kitchen Faucets

fluid™, the manufacturer of faucets and fixtures that make a connection to the influences of the environment and the natural world through their meticulous design process and use of materials, has unveiled additions to their collection of sustainable faucets with the introduction of a kitchen series: F-810 and F-821. These faucets

are the model of what a contemporary, sustainable kitchen faucet should be. The polished chrome pull down high arc spout is designed with 360 degree rotation capability. The faucets are constructed from heavy brass for durability and reliability. The single handle operation allows both volume and temperature control. The dual function spray head has an aerated flow of 2.2 gpm at 60 psi. They are ADA compliant.

MTI Announces the Addition of the Addison 2 Tub

The Addison and Addison 2 exude sophistication with their elegant concave ends and bold simplicity. The vessels have backrests that are gently contoured to be supportive, comfortable and relaxing.

The Addison and Addison 2 are made of MTI's own engineered solid-surface material, a mixture of ground natural minerals and binding agents that has been liquefied, poured and hardened. The result is a nonporous, stain-resistant, surface that looks and feels like natural stone. The Addison measures 66.125" x 36.125" x 23.25". The Addison 2 measured 65.5" x 32" x 22.25".

Saniflo Unveils SANIACCESS 3 Upflush Macerating Unit

The new SANIACCESS 3 upflush macerating plumbing system from SFA Saniflo U.S.A. comes equipped with not just one, but two easy-to-open panels atop the unit, providing ready access to the internal components for servicing. Periodic maintenance can be accomplished quickly and easily without having to disconnect the unit from either the toilet or the rest of the plumbing system.

The SANIACCESS 3 ships fully pre-assembled and ready for installation directly behind the rear-outlet toilet that is available with the macerator. If the home or building owner prefers to conceal the unit behind a finished wall, an 18-inch extension pipe for making the macerator-toilet connection is available.

Bemis Introduces Alesio 2 Toilet Seat

Bemis Manufacturing Company, a world leader in toilet seat engineering and design, has introduced Alesio 2®, an elegant and sturdy high-density molded wood seat that features its Whisper•Close® with Easy•Clean & Change™ hinges and the revolutionary STA-TITE® Seat Fastening System™. The seats have a uniquely contoured design

and smooth high-gloss finish that mirrors the look of vitreous china. The process used in making the seats gives them a density not found

in traditional wooden seats, while delivering a sleek profile and a seat that will stand out in showrooms and bathrooms.
