WARNING

INSTALL TO PERMIT ACCESS FOR SERVICING.
INSTALL THIS UNIT IN ACCORDANCE WITH THE LOCAL ELECTRICAL CODE.
(Canadian electrical code, part 1, for Canada).
NOT APPLICABLE IF UNIT IS SUPPLIED WITH AN ELECTRIC PLUG.

DANGER: RISK OF ELECTRICAL SHOCK. (Consult local electrical sub code official).

Use this unit only for its intended use as described in this manual. Do not use attachments not recommended by the manufacturer. For indoor use only. Grounding is required. The unit should be installed by a qualified service representative and grounded. The unit must be connected only to a supply circuit that is protected by a ground fault circuit interrupter (GFCI ñ class A in Canada). Such a GFCI should be provided by the installer and should be tested on a routine basis. To test the GFCI, push the test button. The GFCI should interrupt power. Push the reset button. Power should be restored. If the GFCI fails to operate in this manner, there is a ground current flowing, indicating the possibility of an electric shock. Do not use this unit, and have the problem corrected by a qualified service representative before using. For permanently connected units, a green colored terminal is provided within the terminal. To reduce the risk of electric shock, connect this terminal or connector to the grounding terminal of your electric service or supply panel with a conductor equivalent in size to the circuit conductors supplying this equipment. This unit has no user serviceable parts. All service must be performed by a qualified service representative. Each accessory is supplied with its own separate operating instructions and must be read, followed and saved. Always consult local codes and/or local sub code official.

WARNING - IMPORTANT SAFETY INSTRUCTIONS

1. DO NOT allow children to use this unit without close adult supervision.
2. DO NOT drop or insert any foreign object into any opening.
3. DO NOT disconnect, alter or tamper with any electrical wiring. Service must be performed by a licensed electrician or factory authorized person. Power must be off at the source prior to any electrical work.
4. DO NOT use the Air Bath while under the influence of any drugs or alcohol.
5. Persons with heart problems, high blood pressure, other illnesses or pregnant women should consult a physician prior to using an Air Bath system.
6. To avoid injury exercise care when entering or exiting the Air Bath.
7. Warning: Risk of Hyperthermia and possible drowning. Do not use a Hydromassage Bathtub equipped with heater immediately following strenuous activity.
8. Warning: Risk of Electric Shock: Do Not permit electric appliances, such as hair dryer, lamp, telephone, radio or television within 5 ft./1.5m of this bathtub.
9. Caution: Test the Ground Fault Circuit Interrupter protecting this appliance periodically in accordance with the manufacturer’s instructions.
10. Warning: Risk of Hyperthermia or possible drowning. Water temperature in excess of 38C (104°) may be injurious to your health. Check and adjust water temperature before use. Prolonged immersion in water hotter than body temperature may induce hyperthermia.
BEFORE YOU START
Read the instructions completely prior to beginning installation.
1. Carefully inspect the unit for any damage, missing parts, breakage or scratches that may have occurred during shipping. If necessary, file a claim immediately with the freight carrier.
2. Physically measure the unit and verify against the specification sheet. Specs are +/- 3/8”. (Specs are subject to change without notice).
3. Water test all air baths before proceeding with installation. Each unit has been tested in our facility to ensure water tight seals. However, rough handling during shipping may cause leaks. Locate the air bath in an area where it can be filled and drained easily. Fill the unit with water to one (1) inch below overflow. Allow water to stand in unit for five (5) minutes and check for leaks. Operate air bath for at least fifteen (15) minutes. Check the entire system for leaks before, during and after operation.
4. DO NOT USE BLOWER OR ANY PORTION OF THE PLUMBING FOR LIFTING OR POSITIONING OF TUB.
5. Install the drain fitting to the bath. THE DRAIN FITTING WILL PROTRUDE BELOW THE BASE OF THE TUB APPROXIMATELY 1”. Clearance must be provided for the drain by cutting away the subfloor where possible or blocking below the tub may be required. WARNING: FACTORY APRONS DO NOT ALLOW FOR BLOCKING UP OF THE TUB BASE. All blocking must be solid and provide uniform support to bottom of tub. Bath must rest entirely and firmly on the subfloor. DO NOT SUPPORT THE WEIGHT OF THE BATH BY THE RIM.
6. When leveling is required, prepare a bed of wet mortar or plaster and install the bath ensuring the mortar or plaster provides uniform support to all areas of the base. Note: Installing the unit in plaster or mortar provides the most support. When combined with proper wall insulation, this significantly reduces the water circulation noise normally associated with air baths.
7. Frame out under the tub rim as shown in the basic installation diagrams. NOTE: DUE TO THE VARIETY OF INSTALLATIONS POSSIBLE WITH THIS BATH, FRAMING PROCEDURES OTHER THAN THOSE DESCRIBED MAY BE REQUIRED. A ledge under the rim, or an apron without a ledge, may be constructed as required. Where installation will be against a wall, stud wall framing should allow for wall sheathing material to run full length to the floor. Install tub against sheathing as indicated, with blocking below rim to prevent deflection or movement of the tub, but ensuring the tub is not supported in any way by the blocking.
8. When placing the tub in a platform or floor cutout, the opening should be 1” smaller than the specified rim dimensions. Extreme care must be taken in this type of installation to ensure the bath will come to rest entirely on the base and not on the rim.
9. Install standard 1 ½” trap to drain and overflow. Before proceeding, make final operational check by filling tub with water to the overflow and operate blower for 15 minutes. Carefully check for leaks both while blower is activated and while the blower is turned off. Allow water to stand in bath for at least 30 minutes before draining. MANSFIELD WILL NOT BE RESPONSIBLE FOR WATER DAMAGE OF ANY KIND IN CONNECTION WITH ONE OF OUR AIR BATHS. At this point, the bath must be checked to ensure proper drainage of the bath floor.
10. Always reference faucet manufacturer’s installation instructions. Install fill valves and spout in desired location. When selecting fill spout, ensure that it is long enough to clear the bath rim from its desired location on or near the bath. When installing, be sure to hold the spout in its intended location and check for proper clearance. If installation is to be on the bath, check backside of bath for adequate space for connection to water lines before drilling or cutting the bath.
11. Complete installation by trimming around bath with desired finish materials. Seal joints under bath rim and against wall with water resistant sealer.

NOTE: ANY ALTERATIONS, ADDITIONS OR DELETIONS MADE TO THE AIR BATH SYSTEM OR BATH WILL VOID THE WARRANTY.

If you have any questions, discover any damage, leaks, missing parts, etc., do not proceed with installation. Call our Customer Service Department at 800-999-1459. We will be happy to help you.

APRON INSTALLATION INSTRUCTIONS

INSTRUCTIONS APPLICABLE TO RECTANGULAR MODELS
Optional removable aprons are available with some models for alcove installations.

IMPORTANT: The use of mortar or gypsum plaster mix is recommended on all installations. However, when installing a bath that requires a removable apron it is important that the bath not be raised from the subfloor more than \( \frac{1}{4}'' \) maximum.

TRIMMING INSTRUCTIONS
1. Protect the acrylic with tape.
2. Mark off evenly on both ends the amount of apron not needed.
3. Always add approximately 1/8" to total measurement. Remember it is always better to allow for mistakes. Mark off extra and sand back to exact lines.
4. When marking line to be trimmed, be sure that the line is 90 degrees square with top horizontal detail line of apron.
5. Secure apron on table or get someone to hold the apron or panel firmly so that it does not move.
6. Cut using a jigsaw with a melamine blade or metal blade (minimum 14 teeth/inch).
7. Dress rough edges or chipped acrylic using a belt sander, angle grinder or sanding block. (60 grit paper recommended).

OPTIONAL NAILING FLANGE (Factory Installed)
The optional nailing flange is factory installed and secured to the tub with bonding adhesives and silicone sealers. The purpose of the nailing flange is to create a water tight seal to protect from water running behind the wall. The nailing flange may be nailed or screwed to the stud wall. This permits installing the bath next to walls.

NOTE: The Nailing flange is an optional feature and can be ordered with almost any rectangular or corner model.

An optional field installed Nailing Flange Kit is also available.
APRON INSTALLATION INSTRUCTIONS

See diagrams for factory apron installation. **IMPORTANT:** Use of factory aprons requires the unit to be secured directly to the subfloor. The subfloor MUST be the same height as the finished floor or the apron cannot be installed. Mansfield Plumbing Products will not be financially responsible for either. After the installer has decided the exact measurement, the panel or apron should be trimmed by following the procedures on the next page.

1. The following tools and parts will be needed for installation:
   - Six, self-tapping screws
   - Three, #10 1” Stainless steel screws
   - One, 1 ½” x 1 ½” plastic angle
   - One, apron panel
   - One, Toe strip with Velcro fastener
   Tools needed:
     - Phillips head screwdriver or power drive with attachments.
     - 1/8” drill bit
     - Framing square

   You will also need a 2” x 2” wood strip the length of the bath.

2. If necessary, trim panel to dimensional requirements. See Trimming Instructions on previous page.

3. Locate the three wooden blocks attached to the underside of the bath deck. See Diagram 1.

4. Remove the peel-off backing from the 1 ½” x 1 ½” plastic angle. Note: the plastic angle should be 2” shorter than the bath length.

5. Position the angle on the wooden blocks, leaving a ¼” gap between the angle and the bath lip. See Diagram 2.

6. Drill two 1/8” pilot holes through the plastic angle at each wooden block location. Note: Do not penetrate the wooden block more than 1/8” depth.

7. Secure the plastic angle to the wooden blocks with two #6 self-tapping screws per block.

8. Using a carpenter’s square, place a mark on the floor at each end of the bath, precisely vertical with bath rim. See Diagram 3.

9. Now measure a distance of 2 ¼” inward from each mark toward the bath base. This will spot your 2” x 2” wood strip location.

10. Secure the wood strip by lagging to the floor or attaching each end to the bottom surrounding framework.

11. Before positioning, detach the toe strip from the panel by separating the Velcro fastener. Align the top edge of the panel so it is parallel with the bottom of the bath rim. Slip the panel up between the rim and the plastic angle while holding the panel at the bottom. Move it inward toward the bath and butt the toe kick against the 2” x 2” wood strip. The panel should be positioned vertically with the bath rim, and the top offset should meet the bottom of the bath rim. Installation can be assisted by cutting two 2” x 4” blocks and shimming underneath the toe space to keep the panel aligned while attaching.

12. Secure the toe space flange to the 2” x 2” wood strip by positioning the screws at the factory drilled 3/16” hole location and screwing the wood strip as shown in Diagram 4. Attach the toe strip to the flange.

**CORNER APRON TRIMMING INSTRUCTIONS**

**TOOLS NEEDED FOR TRIMMING APRON:**
- 7 ¼” Circular Saw
- 7” Abrasive Coated Blade (Diamond coated preferred)
- Framing Square
- Tape Measure
- #2 Pencil

**Caution:** Do not use permanent marker on apron or panel.

1. Mark off evenly on both ends the amount of apron not needed.
2. Always add approximately 1/8” to total measurement.
3. When marking the line to be trimmed, be sure that the line is 90 degrees square with the top horizontal detail line of apron.
4. Secure apron on table or get someone to hold the apron or panel firmly so it does not move.
5. Slowly remove apron area not needed.
6. Dress rough edges or chipped acrylic using a belt sander, angle grinder or sanding block (60 grit paper recommended).

**Remember:** It is always better to allow for mistakes. Mark off extra and sand back to exact lines.

**CORNER APRON INSTALLATION INSTRUCTIONS**

**TOOLS NEEDED FOR INSTALLING APRON:**
- Seven (7) #10 1 ½” flathead screws (included with apron).
- Electric or pneumatic drill
- 1/8” drill bit
- Phillips head screwdriver

1. Follow steps 8 – 12 under Removable Apron Installation Instructions.
2. Position apron under the bath lip. Be sure detail breaks on the apron and bath are aligned.
3. Align provided toe piece with bottom of apron and secure with Velcro strips (Diagram C). Toe piece will cover exposed portion of screws.

WARNING: ALL ELECTRICAL CONNECTIONS SHOULD BE MADE BY A LICENSED, LOCALLY CERTIFIED ELECTRICIAN, IN ACCORDANCE WITH THE REQUIREMENTS OF THE NATIONAL ELECTRIC CODE AS WELL AS APPLICABLE STATE AND LOCAL CODES AND PROCEDURES.

WARNING: RISK OF ELECTROCUTION.

1. All Air Baths must be connected to a circuit that is protected by a Ground Fault Circuit Interrupter. 120 V, 60 HZ, 15 AMP located at the main fuse box.

2. Use 12 gauge three conductor cable (2 wires plus ground) in connections up to 100 feet from the main fuse box.

REFERENCE BASIC WIRING DIAGRAM BELOW.
BEFORE OPERATING THE AIR BATH, FILL THE BATH TO NORMAL BATHING LEVEL. (MINIMAL 3” BELOW OVERFLOW).

A. OPERATION OF AIR BUTTON – Simply press the air button and the system will turn on. Press the air button again and the system will turn off.

B. The system is equipped with a 20 minute timer. The blower will turn off automatically after the time has elapsed.

Note: The air bath is equipped with a blower that is programmed with a purge cycle. When the bather is finished, the water should be drained from the bathtub. The system will turn on again and purge any remaining water from the air system and then turn off.
MAINTENANCE, CLEANING AND REPAIRS

Your PRO-FIT® Air Bath is made of cast acrylic. Cast acrylic provides a beautiful, high-gloss finish that is extremely durable and is a beautiful look in any bathroom.

IMPORTANT! Use the recommended information described in this section. Use of other cleaning materials and/or methods may harm your Air Bath and will void your warranty. The Air Bath surface will retain its color and glass indefinitely with normal use, but some bathroom cleaning agents will cause harm. Failure to perform periodic maintenance on your Air Bath may cause health and/or safety problems as well as possibly harming the bathtub, blower or piping thus voiding all warranties.

CLEANING

Because of the detrimental effects that mineral deposits, soap scum and hard water stains have on finished surfaces, it is important to clean your bathtub and the fixtures of your Pro-fit® Air Bath system on a regular basis.

1. Once a week, wash all exposed surfaces of the bathtub with a mild solution of vinegar and water. Check for stubborn spots. Oily or greasy spots can be lifted with denatured alcohol. Wipe off with clear, warm water and dry with soft cloth.

WARNING: Under no circumstances should abrasive tools or abrasive cleaners be used on any part of the bath. Examples include, but are not limited to, wire brushes, metal sponges, knives, steel wool, scouring pads, petroleum based solvents such as paint thinner, acetone or scrubbing cleaners. All of the afore mentioned products and the like will damage the finish of the bathtub.

2. Twice per month or more, depending on usage, purge and clean the entire Air Bath system following the directions below.
   a. Turn the air controls to the lowest setting and fill the Air Bath with hot water.
   b. Add Two (2) tablespoons of low sudsing automatic dishwasher detergent and ½ cup of household bleach to the water.
   c. Run Air Bath for at least 15 minutes.
   d. Drain, refill with cold water and operate for 10 minutes. Drain again and wipe the surface with a soft cloth.

Surface Repair

If an accident occurs and your Air Bath has a scratch or minor abrasion, it can be repaired by buffing. If the damage is superficial, use a polishing compound used for automobile finishes. If the damage is a little deeper, sanding the spot before applying the polish will normally take care of the problem. The depth of the scratch or abrasion will determine the sandpaper grade to use. A 600 grade paper is required for light to moderate damage and 400 to 220 grade will be needed for deeper damage. When sanding, begin with the lowest number grade of paper and work up to using the auto car polish. With a change of paper, you will need to sand a slightly larger area than the damaged area.

It is not recommended that you repair heavy damages or damage in the bottom of the bath yourself. We will be happy in assisting you in finding a qualified acrylic repair company.
WARNING - DANGER: BEFORE EXAMINING ANY ELECTRICAL PART OR FITTINGS UNDER THE AIR BATH, SHUT OFF THE ELECTRICAL POWER AT THE CIRCUIT BREAKER AT THE MAIN POWER SUPPLY.

NOTE: The Air Bath blower housing is a sonically welded unit. It cannot be disassembled for servicing. There are no user serviceable parts inside. Refer all service to Mansfield customer service at 1-800-999-1459.

CODE COMPLIANCE

Accepted by the “Swimming Pool Research Committee” of the International Association of Plumbing and Mechanical Officials as meeting the requirements of the Uniform Swimming Pool Code. (For Whirlpool Piping). Listed SP-1179

ETL Listed (Complies with U.L. Standard 1795). Hydromassage Bathtub Listed 3129295

Accepted by the “Plumbing Research Committee” of the International Association of Plumbing and Mechanical Officials as meeting the requirements of the Uniform Plumbing Code. (For Acrylic Bath Shells). Listed 2719
WARRANTY

Mansfield Plumbing Products, LLC offers the following expressed warranty to the original purchaser of any Pro-fit Air Bath or Bathtub who purchases the product for personal or single family residential use ("user"). We will repair or replace, at our sole option, the product or its equipment in accordance with the following terms and conditions.

ONE (1) YEAR WARRANTY FOR ACRYLIC SHELL

Mansfield Plumbing Products, LLC extends to the user of the product a non-transferable One (1) year warranty from the date the product was originally purchased by the user, but not more than Two (2) years from the date of manufacture that the shell will maintain its structural integrity and be free of water loss due to a defect in the tub shell. This warranty covers only the product shell against defects in material or workmanship.

ONE (1) YEAR LABOR WARRANTY FOR ALL FACTORY INSTALLED COMPONENTS

Our limited labor warranty is for a period of One (1) Year from the date the product was originally purchased by the user, but not more than Two (2) years from the date of manufacture. All factory installed components (e.g., pump, motor, jets and plumbing) are covered under our labor warranty against failure due to defects in materials and workmanship.

WARRANTY LIMITATIONS

In no event shall Mansfield Plumbing Products LLC be liable for incidental or consequential damages, for damages resulting from improper installation or for damages caused by handling, neglect, abuse or alteration. Our warranty does not cover defects or damage caused by the common carrier, installer, user or other persons resulting from, without limitation: careless handling, improper voltage supply/electrical modifications, misuse; incorrect operation; lack of or improper routine maintenance; incorrect or inadequate water use or use of improper cleaners. Chips, cracks and scratches are damages and are not covered under warranty; however, they may be repaired by a qualified technician at the user's expense. Damages or defects that should have been detected before installation are not covered. All implied warranties, including any warranty of fitness for any particular purpose of merchantability, or those that might arise from a course of dealing with the purchaser or usages of trade, are hereby disclaimed or excluded.

Mansfield Plumbing Products is not responsible or liable for any delays or any failure to perform due to unforeseen circumstances or causes beyond Mansfield Plumbing Products’ control, when such delays or failure is due, directly or indirectly, to acts of God, war (including civil war), riots, embargoes, acts (whether sovereign or contractual) of civil or military authorities, acts of any government, major change in economic conditions, fires, floods, explosions, the elements, epidemics quarantine restrictions, strikes, lockouts, plant shutdowns, slowdowns, accidents, shortages of raw energy, materials, component parts, labor, or delays of suppliers or subcontractors.

Note: Some states do not allow limitations on an implied warranty, and some states do not allow exclusions or limitations regarding incidental or consequential damages, so the above limitations may not apply to you. This warranty gives you specific legal rights and you may have other rights which vary from state to state. No person is authorized to change, add to, or create any warranty or obligation other than set forth herein. This is our exclusive warranty.

RESPONSIBILITIES OF OTHERS

Inspecting the unit prior to installation is the responsibility of the installer or building contractor who acts on behalf of the user. They are responsible for ensuring the unit is free of defect or damage. Notices are placed on and in the unit and on the shipping carton advising the installer of this responsibility. In the event of a problem, the unit must not be installed. The Company is not responsible for failures or damage that could have been discovered, repaired, or avoided by proper inspection and testing (including proper water testing) prior to installation.

Damage occurring in transit is the responsibility of the carrier. The user or installer MUST open the crate and inspect the unit for damage when it is delivered. If damage is discovered, it must be reported immediately to the seller and the carrier in writing, and an inspection requested. Failure of the carrier to respond should be reported to the seller and the carrier. Your freight claims should be filed promptly thereafter.

It is the responsibility of the installer, building contractor, or user to provide access for service. Mansfield Plumbing Products, LLC is not responsible for any costs relating to obtaining access for repair.

WARRANTY SERVICE

Mansfield Plumbing Products, LLC maintains a list of independent service personnel to perform required warranty service repairs. Such firms are not agents or representatives of Mansfield Plumbing Products, LLC and cannot bind us by words or conduct. We will provide warranty service when Mansfield Plumbing Products, LLC has been notified of the problem during the active warranty period and deemed the problem to be of the nature or type covered by the warranty.

The product serial number, users address and contact information must be provided to obtain warranty service.

SERIAL NUMBER
